A COLLABORATIVE EVENT BY:

**PHARMACY DEPARTMENT,
INSTITUT KANSER NEGARA (IKN)**

**PERSATUAN PENDIDIKAN PERUBATAN,
INSTITUT KANSER NEGARA (PPPIKN)**

ABOUT

EVIDENCE SYNTHESIS GOING UP ALLEYS

'Evidence synthesis' refers to the process of bringing together information from a range of sources and disciplines to inform debates and decisions on specific issues. Because health outcomes are probabilistic, most decisions are made under conditions of uncertainty. Decision-making in healthcare are best served if policymakers have access to the best latest evidence on an issue. An accurate, concise and unbiased synthesis of the evidence is therefore one of the most valuable contributions can be made to ensure the best health outcomes.

Pharmacy department of IKN and PPPIKN are pleased to announce "Evidence Synthesis: Going Up Alleys" which will take place on 18th to 19th February 2020 in Institut Kanser Negara, W.P.Putrajaya. This seminar will bring together research experts to discuss clinical research methodology, data management and research workflow to create a self-educational, dynamic environment by focusing on technical aspects of clinical research.

MEET OUR SPEAKERS

GET INSPIRED BY THESE AWESOME SPEAKERS

DR. ASRUL AKMAL SHAFIE
