My Fellow Parents,

It gives us great pleasure to invite you to attend the **Malaysian Medical Association's Career Guidance Conference (MMA's CGC) 2024**. Over the years, we have realised through experience and feedback that the expectations of the current generation of our workforce is not aligned to the realities of work life. This predicament is not confined to the realms of the medical fraternity but rather cuts through all professions.

Therefore, we have for the second time, come up with this conference due to the overwhelming response and support we received the first time around (in Kuala Lumpur). This conference strives to address issues that many high school students have always wanted to know but have had challenges finding out.

The objectives of this event are:

- To bring about an awareness of the various career options available
- To collaborate with other professional organisations and give insight into real-life challenges of the various professions
- To align expectations and realities of working life in order to make informed choices
- To channel all profits earned towards an Education Fund in aid of student activities

We have invited prominent and experienced speakers to address the above issues during this conference. This event is free of cost for students (preferably 15 to 17 years of age) and their parents to attend. It is one of the many CSR projects undertaken by the MMA. We are being ably supported by private educational institutions. The participants may choose to visit their booths during the course of this event. We hope that you will join us and benefit from MMA's CGC.

Dr Sivabala Selvaratnam
Chairman, Organising Committee

THE OBJECTIVES OF THIS EVENT ARE:

To bring about an awareness of the various career options available

To collaborate with other professional organisations and give insight into real life challenges of the various professions

To align expectations and realities of working life in order to make informed choices
