

Timothy Cheng, 35, hails from Selangor but has spent nearly a decade serving in Sabah as a doctor and about two years as an orthopaedic surgeon. He is an active member (and committee member) of the Malaysian Medical Association and has a passion for public health and charity event organizing.

The founder of MMA's annual charity cycling program, he is grateful to the AWOL riders that he met during last year's event (Cycle For Cancer 2022) for the invaluable guidance and assistance in the planning of this year's event. He hopes that this would be an annual event; one that not only raises funds for charity but also draws people to the Borneo states – Sabah and Sarawak, especially in the often forgotten interior regions.
